www.ellasbubbles.com

About Us

Ella's Bubbles is an OEM manufacturer based in Chicago, specializing in the production of Ella brand acrylic walk-in bathtubs and accessible showers. Founded in 2005, we have dedicated ourselves to pushing the boundaries of walk-in bath design. With over 28 proprietary models introduced to the American and Global markets, we are at the forefront of innovation.

Our commitment to providing high-quality, innovative accessibility products and exceptional customer service has established Ella's Bubbles as a leader in the walk-in bath industry. When seeking luxury walk-in baths and bathroom accessories that combine affordability with lasting beauty, look no further than Ella's Bubbles.

Why choose Ella's Bubbles Brand Walk-In Tubs?

Our primary focus is providing comfortable and safe bathroom solutions for seniors and individuals with mobility challenges. These tubs feature a convenient door and a specially molded seat, allowing for easy access and a safe bathing experience. By crossing the low entry threshold and sitting on the seat, users can safely wash and bathe. Investing in one of our bathtubs with a door is the best way to ensure the safety and well-being of parents, grandparents, or anyone facing mobility difficulties. Choose our high-quality bathtubs and prevent accidents, slips, and falls without compromising your safety or that of your loved ones.

Why Choose Acrylic?

Acrylic tubs are the recommended choice for customers seeking:

Acrylic walk-in bathtubs are vacuum formed from a solid Acrylic/ABS sheet. The acrylic material is heated and stretched over a mold, resulting in a glossy white nonporous finish. The result is an easy-to-maintain tub, impermeable to mold. Acrylic offers a smooth surface and strong resistance to chipping, cracking, or fading. Once the acrylic walk-in bathtub shell is removed from the mold, it is reinforced with gel-coated fiberglass and placed onto a stainless-steel rustproof frame. Following this process, additional layers of gel coat fiberglass are added, bonding the shell and frame into one solid structure.

Upgrade to Ella Acrylic Walk-In Tubs for quality and longevity unmatched by gel coat alternatives.

Gel Coat Walk-In Tubs Economical with Basic Durability

Material: Constructed from spray resin and fiberglass particles, coated with a thin gel layer.

Drawbacks:

- Porous surface requires more maintenance and cleaning.
- Prone to dirt and oil buildup, making it slippery over time.
- Color resides on the external surface, leading to quicker fading and reduced lifespan.

Vs.

Acrylic Walk-In Tubs Premium Quality & Long-Lasting Finish

Material: Made from vacuum-formed Acrylic/ABS sheets with a nonporous, glossy white surface.

Reinforcement: Once the acrylic walk-in bathtub shell is removed from the mold, it is reinforced with gel coated fiberglass, and placed onto a stainless-steel rustproof frame. Following this process, additional layers of gel coat fiberglass are added, bonding the shell and frame into one solid structure.

Benefits:

- Easy to clean and maintain.
- Highly resistant to mold, chipping, cracking, and fading.
- Glossy finish with long-lasting color dispersion throughout the material.

WALK-IN TUB Door Options

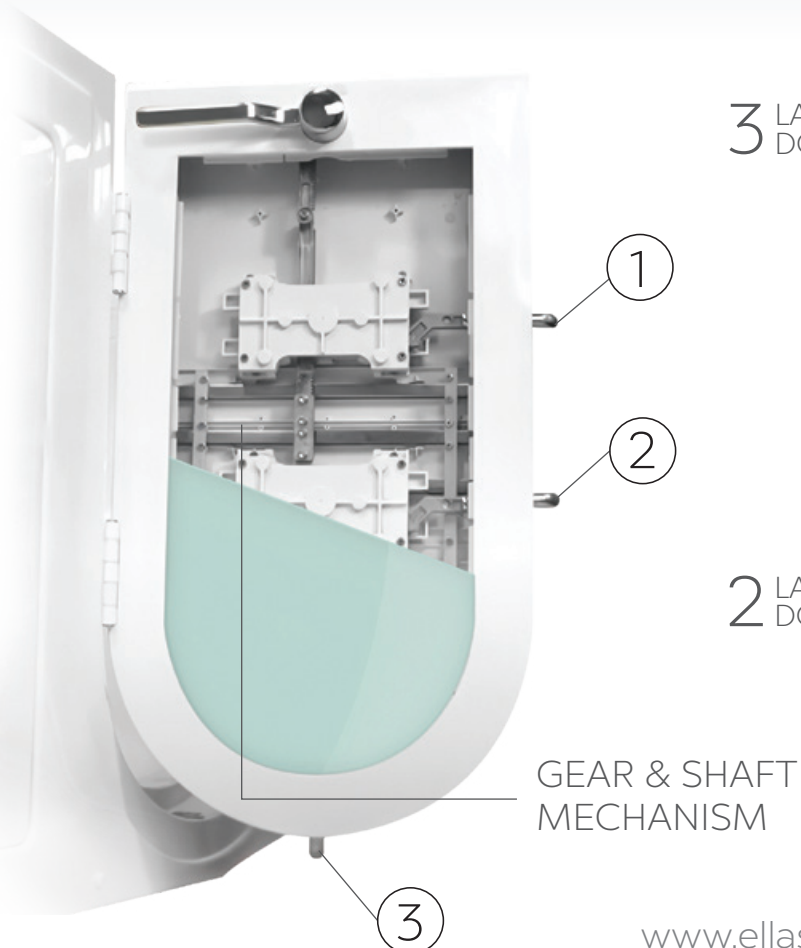

Picking the correct door type is an important detail that you don't want to overlook. There are 'U' shaped doors that sport a modern design, and they're perfect for the common bather. 'L' shaped doors are great for those with mobility issues as they allow for easy transfer from wheelchair to the walk-in bathtub and back.

Outward Swing Doors allow for more room inside the tub, but may require more space in the bathroom to accommodate the door.

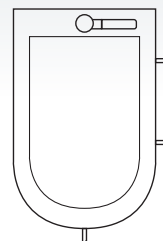

Ella's outward swing door tubs feature a secure 2- or 3-latch locking system, ensuring a watertight seal while providing effortless entry and exit for ultimate safety and comfort.

DUAL DRAIN TECHNOLOGY

Ella Gravity Driven 2" Dual Drain

The Ella walk-in tubs feature industry-leading Dual Drain Technology for the fastest gravity-driven drainage available. It includes dual 4-port or 2-port, 2" oversized drains, each operated independently by durable stainless steel cable controls. This system ensures quick, efficient water release—minimizing wait time. Ergonomically designed handles offer a comfortable, easy grip for smooth operation.

Jetting & Therapy Options

Ella's Bubbles walk-in tubs offer a range of variable jetting options, providing the perfect therapeutic experience tailored to your needs.

SOAKING

Classic bathing experience without jets. Enjoy a serene bathing experience with no jets. Designed for comfort with a spacious interior and low step-in threshold.

HYDRO

Experience a revitalizing massage with targeted hydro jets. Includes adjustable intensity settings and ozone sterilization for optimal hygiene.

AIR

Relax with a gentle, soothing massage from strategically placed air jets. Features variable speed control and an auto-purge system for cleanliness.

AIR + HYDRO (2)

Combines the benefits of air + hydro jet systems for enhanced relaxation. Independent controls provide a fully customizable massage experience.

HYDRO + MICROBUBBLE (2)

Elevate your bath with hydrotherapy and skin-enhancing microbubbles that exfoliate, cleanse deeply, and promote relaxation.

AIR + HYDRO + MICROBUBBLE (3)

A complete therapy system that integrates air and hydro massages with microbubble technology for unparalleled skin care and relaxation.

HYDRO + HYDRO/FOOT (2)

Enjoy a powerful foot massage in minutes without filling the entire Walk-In Bathtub with the Ella Independent Foot Massage.

AIR + HYDRO + HYDRO/FOOT (3)

Combines air and hydro systems with dedicated foot and calf jets, offering total-body relaxation and focused therapy.

AIR + HYDRO + MICROBUBBLE + HYDRO/FOOT (4)

The ultimate therapy package, featuring all jet systems for deep cleaning, soothing massages, and targeted relief.

MICROBUBBLE THERAPY

Ella's eco-friendly Infusion™ Microbubble Therapy releases billions of oxygen-rich, chemical-free microbubbles through a single jet, creating a milky, cloud-like soak that hydrates, exfoliates, and detoxifies—leaving skin soft, smooth, and refreshed.

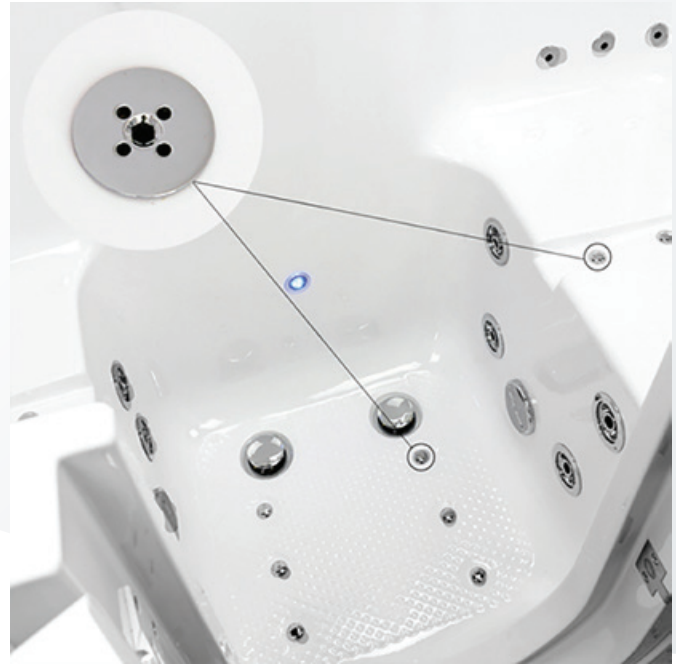

WALK-IN TUB Therapies & Features

Experience the exclusive benefits that only Ella's Bubbles luxurious walk-in tubs provide. Explore each feature below to learn more about our premium products.

Air Massage Therapy

The Air Massage System includes an air pump with a 3-speed variable push control, strategically positioned air jets for optimal therapeutic relief, and an auto-purge to maintain an air system free of any buildups. The Air Massage System's most popular control system is the On/Off Push Control because the buttons were designed to rise above the deck in order to make it easier to push.

- Air Massage Pump
- 3 Speed Control
- Auto-purge (Activates 20 minutes after pump is turned off)
- Air Jets
- On/Off push control

3 Speed Air Massage WITH AUTO PURGE

The air massage system also includes an auto-purge feature. This feature engages automatically 20 minutes after the pump has been turned off to purge water out of the air jet lines. The auto-purge will run for 120 seconds to ensure your system is clear and free of moisture and excess water helping to prevent the mildew build-ups.

Gently Tap 1st / **ON** / High Speed

Gently Tap 2nd / **Medium Speed**

Gently Tap 3rd / **Low Speed**

Gently Tap 4rd / **OFF**

Hydro Massage Therapy

Hydrotherapy is the use of water pressure massage to relieve discomfort and promote physical well-being. A Therapeutic Hydro Massage can help reduce arthritis, muscle or joint pain. That's because the buoyancy of water can help reduce the pressure of gravity on your body, which in turn reduces the pressure applied to your joints. Taking regular warm baths has many benefits.

- Hydro Massage Pump
- Intensity Dial Air Control
- Ozone Sterilization
- Hydro Jets
- On/Off Push Control
- In-line Water Heater

Ozone Generator

Water Temperature & Hygiene:

The **In-Line water heater** helps keep your bath water warm, especially when paired with a 75-gallon water heater (recommended for best results). The chemical-free **ozone sterilization system** activates automatically to eliminate bacteria and odors, supporting a cleaner, low-maintenance tub.

Jet Control & Accessibility

The system starts with a single push of the raised control button, which also activates the heater and sterilizer. You can easily adjust the massage strength using the built-in air control dial. A digital controller is also available, but may be harder to use for elderly users.

Independent Foot & Calf Massage

Enjoy a full body hydro massage with Ella's innovative jetting design, or simply have a powerful, rejuvenating independent foot massage by quickly filling the foot well and using the 6 independent jets dedicated for your feet and calves. No need to fill the whole tub to enjoy a relaxing, luxurious hydro foot massage. The footwell fills in just minutes!

- 2 Hydro Massage Pumps 5 to 7A
- 2 Intensity Dial Air Controls
- Ozone Sterilization 0.04A
- 16 Jets (10 Seat Jets 6 Foot Jets)
- On/Off Push Control
- In-Line Water Heater, 5.5A 650W

With two independently run pumps, you can enjoy a full body massage, or an independent foot massage within minutes of filling the foot well up the seat level. The foot massage system includes a hydro pump with an in-line water heater. Both the strategically positioned upper and lower jets powered by two hydro pumps have an intensity dial air control to adjust the strength of the water pressure to your liking from a gentle pressure to a more rigorous massage.

Benefits

- Uses less water for faster, more efficient therapy.
- Targets feet and calves only—ideal for daily use.
- Quick warm-up with optional In-Line water heater.
- Improves blood flow.

Indulge in a luxurious hydro foot and calf massage, enhanced by **6 strategically positioned jets**. With the dedicated hydro pump and intensity controller, you can tailor the massage's strength to your preference.

Infusion™ Microbubble Therapy

Microbubbles are billions of tiny, oxygen-rich bubbles with no other ingredients or additives. Infusion's patented technology supersaturates water with up to 80% more dissolved oxygen than regular tap water alone. This unique combination of water and air provides more combined benefits than any other bathing technology in history.

How does it work?

The Microbubble system silently immerses the bather in millions of magnetically charged microbubbles that clean, exfoliate, soften and rejuvenate the skin leaving it feeling relaxed and refreshed.

Infusion™ Microbubble Therapy Benefits

GENTLE DEEP CLEAN

Simply soak in the Infusion tub and microbubbles will gently remove impurities from skin and pores, exfoliating your body without you having to scrub. When you step out of the tub, see dead skin wash away, knowing you're clean and refreshed.

OXYGEN BOOST

While your skin is being gently exfoliated, microbubbles simultaneously release 50% more dissolved oxygen (compared to regular water) into the air and bath water surrounding you. Skin is left hydrated, moisturized and restored, feeling supple and smooth.

WATER STAYS WARM

As billions of microbubbles quietly pop around you, the energy they release keeps bath water warm (even increasing temperatures slightly), allowing for an infinite soak at the heat of your choosing.

GENTLE APPEARANCE

A milky, cloudy, champagne-like underwater hydro-mist that surrounds and conceals your body, providing the comfort and privacy of full body immersion and visual relaxation that stimulates additional peace of mind.

WATER SENSATION

A luxurious, silky water that feels soft, smooth and creamy compared to regular water, almost velvety. No oils or additives are required, saving on time and costs, and providing peace of mind that there are zero chemicals in the water.

Therapy for the
Ultimate Relaxation!

Fast Fill Faucets

2 Piece FAST FILL FAUCET

The 2-Piece Fast-Fill Faucet includes a mounted faucet with temperature control and a button to switch between the faucet and the 5-mode pull-out hand shower. It fills at 16 GPM under ideal conditions and comes with two 3/4" braided-steel supply lines and a 5' stainless-steel hose.

- Single handle lever design
- Flow Rate: 16 Gallons Per Minute

Lay-Down WALK-IN TUBS

Introducing Ella's Acrylic Lay-Down Walk-In Tubs, the epitome of style and safety. These luxurious bathtubs feature a unique tempered glass inward swing door with a brushed finish aluminum frame, offering a modern and sophisticated touch to your bathroom.

The central placement of the door allows for a wider glass screen option and more convenient access compared to competitor doors placed on the side. Additionally, the vertical tub wall design provides a wider interior floor and minimizes slip and fall hazards often associated with curved walls in standard bathtubs during entry and exit.

The Ultra is among Ella's Bubbles' newest and most technically advanced standard-size walk-in tubs, boasting new features like a uniquely designed door style, increased interior space, a longer and wider seat, and a lower step-in. It showcases a custom-made, beautifully designed brushed aluminum inward swing door with frosted tempered glass, paired with a white glossy acrylic shell for a sleek and contemporary look.

The door is uniquely extra-wide at the top, facilitating easier access in and out of the tub. The door is secured by an ergonomically designed stainless steel and chrome finish locking handle, ensuring a leak-proof seal. The Ultra comes equipped with Ella's fast-fill faucet and proprietary dual drain technology, offering the industry's fastest gravity-driven drainage. For additional details, downloadable manuals, and specifications, please refer to the information provided.
