

Window Kit

Consists of four 48" long sides that are butted together. Each piece is 6" deep. It must be custom cut to fit.

Corner Seat

Hole Caps

A hole cap is used as a decorative escutcheon cover around tub spouts, shower arms, etc.

Shaving Stand

Trim Details

3/4" trim can be used to trim out a window or as a corner trim in many applications.

1 1/8" trim can be used to trim out a window or as a corner trim in many applications.

F-Channel is used on an outside edge where there is no bullnose.

H-Channel is used to seam two wall pieces together.

Corner Reinforcements are placed in the 2 corners before the walls are installed. They help to square up the walls.

The F-Channel decorative cap molding is used on top of flat walls as a clip-on chair-rail molding for wainscoting.

Trim is available in white, almond, biscuit and gray. CT-S and CT-L also available in pearl. CT-L also available in granite and marbelized colors.
